PROFILE

I am a team player who is committed to excellent learning, ethics and people's collaboration. I am also an excellent communicator with great interest in IT and Technology, I'm an Enthusiastic, self-taught and dedicated software developer with 4 years of experience in designing and implementing innovative Scalable software solutions. Skilled in multiple programming languages and technologies, with a strong foundation in computer science concepts. Adept at collaborating with clients and cross-functional teams to drive project success. Passionate about staying up-to-date with the latest industry trends and technologies. Seeking to contribute my technical expertise and creativity to a dynamic IT or software development team.

CAREER OBJECTIVES

To obtain an opportunity to utilize my skills in an organization or institution that offers both challenges as well as a shot for personal initiative and career advancement, leading up to a position of responsibility as a result of giving service to the employer and society with remarkable performance.

Professional specialization

To further develop and acquire specialized knowledge and skills in the software Engineering Development and Information Technology's career in order to assist and offer expert solutions to the vast growing world and the respective assigned unit.

GOALS

To interact fully and work with the large society, growth-oriented organization or institution dealing with people from all walks of life.

Develop a wide experience in the Software development and IT field through the daily inputs to manifest the same for example, dealing with day to day problems and solving tech/IT related problems in the society

I intend to enhance my technical competencies by staying up to date on evidence based technological development in professionalized field.
